PRASAD SURYAVANSHI

Senior Full Stack Developer | .NET Core & Angular | Azure Cloud

Pune, Maharashtra, India | +91 89756 74089 | suryavanshiprasad007@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience designing, building, and maintaining enterprise web applications across the .NET Core and Angular stack. Proven track record delivering scalable RESTful APIs, responsive single-page applications, and event-driven, cloud-native solutions on Microsoft Azure. Engineered a high-throughput Azure Function that streams 2–4 GB files directly from Blob Storage, cutting processing time from 30–40 minutes to 3–10 minutes. Skilled in clean architecture, performance optimization, and secure API design, with hands-on expertise in large-file streaming, automated document workflows, and AI-assisted development tooling. Strong collaborator in Agile teams, code reviews, and end-to-end delivery from requirements through production support.

CORE TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript, HTML5, CSS3

Frameworks & Libraries: .NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, ADO.NET, Angular, RxJS, Bootstrap

Cloud & DevOps: Microsoft Azure (Functions, Blob Storage, App Services), Git, GitHub, CI/CD

Databases: SQL Server, MySQL (T-SQL, stored procedures, query optimization, indexing)

Architecture & Security: RESTful Services, Microservices, Repository & Unit of Work patterns, Code-First Migrations, JWT & RBAC

Tools: Visual Studio, SSMS, Postman, iText7, Windows Desktop Applications

AI-Assisted Development: GitHub Copilot, Claude AI, ChatGPT, OpenAI Codex

Soft Skills: Problem-Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability

PROFESSIONAL EXPERIENCE

Programmer Analyst (Full Stack Developer) — Rheal Software

May 2022 – Present

Pune, India • .NET Core, Angular, Azure, SQL Server

Claim Management System (CMS)

- Built and maintained end-to-end claim-processing workflows using .NET Core Web API, Angular, Azure Functions, and SQL Server, supporting high-volume, mission-critical claims operations.
- Designed and developed RESTful APIs with ASP.NET Core to handle high-volume claim data reliably, reducing manual processing effort across claim intake and review stages.
- Developed dynamic, responsive Angular components and services, leveraging RxJS for reactive state management and real-time UI updates.
- Implemented Azure Functions to process background tasks and event-driven workflows, decoupling long-running operations from the request pipeline and improving system responsiveness.
- Secured the application with JWT authentication and role-based access control (RBAC) across user and administrator roles.
- Optimized SQL queries and stored procedures, improving database response times and safeguarding data integrity for high-volume claim records.
- Collaborated in an Agile environment through code reviews and daily stand-ups, ensuring high code quality and on-time delivery.

Grip — Claim Inspection & Document Management Platform

- Developed claim inspection and document management modules with .NET Core and Angular, supporting claims, inspections, documents, and invoice processing end-to-end.
- Designed database entities, relationships, and migrations using Entity Framework Core (Code-First), building clean, testable data-access layers.

- Engineered a high-performance Azure Function that streams directly from Azure Blob Storage via the SDK to generate large (2–4 GB) ZIP archives, cutting generation time from 30–40 minutes to 3–10 minutes and dramatically reducing memory footprint.
- Built automated PDF generation for inspection reports using iText7 and ABC Pdf, and implemented invoice generation driven by inspection and estimate data.
- Integrated Azure Blob Storage for secure storage and retrieval of inspection photos and generated reports.
- Optimized database queries and application performance to handle large claim records and extensive photo collections at scale.
- Contributed to code reviews, bug fixing, testing, deployment, and production support.

Party Space Management System

- Delivered a venue-booking and event-scheduling platform using .NET Core Web API, Entity Framework Core (Code-First), Angular, and SQL Server.
- Implemented RESTful APIs for booking management, real-time availability checking, and user registration modules.
- Applied Repository and Unit of Work patterns for a clean, testable, scalable architecture; managed migrations, seeding, and transactions for data consistency.
- Used LINQ for efficient data retrieval and filtering across available venues, booking history, and payment records.
- Improved performance by optimizing API calls and EF Core tracking and loading strategies.

EDUCATION

Master of Computer Application (MCA)
Sinhgad Institute of Management and Computer Application, Pune • GPA: 8.06 / 10 — June 2021 – June 2023

BBA (Computer Application)
Dada Patil College, Karjat • GPA: 8.70 / 10 — June 2018 – June 2021

ACADEMIC PROJECTS

- Construction Management System — Web-based project tracking and resource management application.
- Typing Institute Management System — Student enrolment, batch scheduling, and progress tracking system.
- Contacts Management System — CRUD-based contact organizer with search and categorization.

CERTIFICATIONS

- Government Certification in Computer Typing (GCC-TBC) — English: 30 & 40 WPM | Marathi: 30 & 40 WPM.

ADDITIONAL INFORMATION

- Notice Period: 60 days (industry standard, negotiable).
- Languages: English, Hindi, Marathi.
